Deeptadeep Roy

Technology Analyst @ Infosys | JavaScript, Java, Swift
Kolkata, West Bengal, India

Summary

I design, develop, and deploy innovative solutions for various clients as a Senior System Engineer. I collaborate with a team of talented developers to create user-friendly and scalable applications that meet the business and user requirements. Some of my recent achievements include:

Improving the performance and security of a web application for clients by implementing Java-Spring, ReactJS / Angular, SQL, and Jira.

I graduated with a Bachelor of Technology in Electrical Engineering from Kalinga Institute of Industrial Technology, Bhubaneswar in 2021. I am passionate about learning new technologies and applying them to solve real-world problems. I am also motivated by the opportunity to work with diverse and collaborative teams, and to deliver high-quality and impactful solutions that add value to the clients and the users.

My goal is to continue to grow as a full stack developer and to take on more challenging and rewarding roles in the future.
